"The best work of the kind we have ever seen."

GARDNER'S REVIEW IN LAW AND EQUITY.

A Hand Book for Law Students.

This book is especially designed for students who are making their final preparations for admission to the Bar. It may also be found useful throughout the period of study. It gives a clear and concise statement of the leading principles of those branches of the law which are taught in the law schools of the country, and which form the subjects of Bar examinations. **Brevity, Clearness and Simplicity** have been constantly in mind in its preparation. Every statement in the text has been verified by an examination of authorities which are fully cited in the book, and which add substantially to its availability.

Some of the subjects treated in the book, *which embraces an entire course of law studies*, are the following :

The Feudal System, English Tenures, Real Property, Personal Property, Contracts, Quasi-Contracts, Evidence, Equity, Pleading, Torts, Bills and Notes, Agency, Bailments, Corporations, Criminal Law, Domestic Relations, Wills, Devises, Legacies, Partnerships, Sales, etc., etc.

From the Michigan Law Journal:—"This small volume covers in quite a comprehensive manner the whole field of law and equity. A mastery of it will possess the student with almost all the requirements for admission to the bar. *It is beyond question the best work of the kind we have ever seen.* In no other is the whole field so thoroughly covered. In no other can there be found such a perfect combination of clearness and brevity."

From the New Jersey Law Journal:—"This little book answers a long-felt want. To the student it will save a great deal of unnecessary work, for as a review it puts into brief compass all that is necessary, and we venture to say that if carefully followed, a candidate will have little difficulty in passing any examination at any bar to which he may apply for admission."

From the Yale Law Journal:—"The author has reviewed clearly and briefly the entire field of law and equity, and his book, containing a concise statement of the leading principles of each, is an epitome of the best text-books in use in our various law schools. The subject of real property, one of the most difficult to master, though treated with brevity, is nevertheless very clearly presented. The various estates are carefully defined, and then illustrated by well selected examples which materially aid the student in comprehending the technical differences of each. The chapter on Quasi-Contracts, a subject of increasing importance and one which many text-books overlook entirely, deserves especial mention for its concise but clear presentation. Among the other principal subjects discussed are Contracts, Torts, Pleading, Evidence, Criminal Law and Corporations. *A student who masters this volume will have a clear knowledge of the principal subjects of law, and may approach a bar examination with confidence.*"

BEACH ON INJUNCTIONS, 1895.

Commentaries on The Law of Injunctions, as Determined by the Courts and Statutes of England and the United States.

By CHARLES F. BEACH, JR.,

Author of "Equity Jurisprudence" and "Practice," "Public Corporations," "Negligence," etc.

Two Volumes, \$12.00 Net.

"In this treatise on Injunctions Mr. Beach has given the profession a very useful and practical book, one which will prove of great aid and assistance. The law as it is to-day is fully and carefully stated and the citations are numerous and to the point.—*The Green Bag*.

"The arrangement of the work is logical, the statements of the law clear and positive, the discussion of principle carried out in full detail."—*The American Law Register and Review*.

PINGREY ON REAL PROPERTY, 1895.

A Modern, Comprehensive and Exhaustive Treatise on the Law of Real Property.

By DARIUS H. PINGREY, LL.D.,

Author of "Real Estate Mortgages," etc.

TWO LARGE VOLUMES, \$12.00 NET.

"The work has been constructed on modern lines, and is a complete and practical treatise on the subject, serving at one and the same time the wants of the student and the practitioner. You are quite right in supposing that the law of real property has been essentially modified in this country, and it must be a great satisfaction to the profession to find a book which brings down the American decisions and the doctrines which they establish completely to date."—*Hon. John F. Dillon, New York City*.

"The work is received. I am very much surprised at its scope and magnitude. It is a monument of research and appears to include almost every phase of real estate law from the earliest times down to the present. No work of the kind could possibly be produced without years of study and patient investigation. Such a work as this is a credit not only to the author, but to the age in which we live, and I have no doubt it will be greatly appreciated by any lawyer who has any occasion to turn his attention to real estate law. It is deserving of the widest publicity and use."—*Judge Elliott Anthony, Chicago*.

"I have carefully examined your treatise on Real Property. Great ability and care are evinced in its preparation. It is an admirable work and will prove invaluable to the profession."—*Vice-President Stevenson, Vice-President's Chamber, Washington, D. C.*

Curtis on United States Courts.

JURISDICTION, PRACTICE, AND PECULIAR JURISPRUDENCE OF THE COURTS OF THE UNITED STATES. By Benjamin R. Curtis, LL.D., late Associate Justice of the Supreme Court of the United States. Second Edition, revised and enlarged, by H. C. Merwin, Law Department of Boston University.

THESE lectures were delivered by the late Judge Curtis to a class of students in the Harvard Law School, in the Academic year, 1872-73, and were edited and prepared for the press by his son and brother, both lawyers of prominence. Mr. Merwin has devoted much time to the consideration of the recent changes and developments in the practice of the Federal Courts; and his additions, in the second edition, especially the three new chapters on "Appeals from Federal Courts," "Removal of Suits," and "Habeas Corpus," are thought by those who have examined them to deserve the words of commendation bestowed upon Judge Curtis's original text. The chapter on "Admiralty" has been very carefully and fully annotated.

EXTRACTS FROM NOTICES OF THE BOOK.

Though it is intended primarily for students, the book will undoubtedly be of great assistance to the skilled practitioner on account of its accuracy of statement and its broad scope.—*Yale Law Journal*.

The Supreme, Circuit, District, and Admiralty Courts are treated fully and clearly, together with Habeas Corpus and Procedure and Practice.—*Boston Advertiser*.

All lovers of an able and well written law book should be grateful to Mr. Merwin, by whose efforts this work of standard legal and literary value has been given a renewed lease of usefulness.—*American Law Register and Review*.

The Principles of Equity and Equity Pleading.

By ELIAS MERWIN, late of the Boston Bar, and Professor in the Law School of Boston University.
 Edited by HENRY C. MERWIN. 1 vol. 8vo, law sheep, \$6.00 *net*.

This is a compact treatise, dealing with both Equity Jurisprudence and Pleading. Unlike the great majority of text-book writers, the author had an extensive practice, and was thoroughly versed in Equity. For several years before his death, Mr. Merwin lectured on Equity at the Law School of Boston University. The book is designed for students, but it will also prove useful to practitioners. It presents the subject in a remarkably concise form; it contains elaborate and carefully written notes on new subjects, such as Injunctions in cases of Strikes, "The Right to Privacy," and recent Trade-Mark Cases; and the whole book is at once so accurate, clear and readable that it will prove a distinct addition to the catalogue of indispensable law books. It has the classic literary qualities of Benjamin on Sales.

LAW BOOKS.

Among the new books of the year the most notable is **Dicey on the Conflict of Laws**, one volume, law sheep, \$6.50 net. Prof. Dicey, who occupies Blackstone's chair at Oxford, is one of the clearest and ablest legal authors in England, and the text of this new work sustains his reputation. The American notes are by Prof. J. B. Moore of Columbia University, author of "Moore on Extradition," etc. The subject while especially interesting in our country, where we have so many coördinate jurisdictions, lends itself especially to international treatment, because our states are in many matters of law as foreign to each other as are the United States and Great Britain.

Another international book, nearly ready for publication, is **Taylor on Evidence, Ninth Edition**. This is the leading English work on Evidence, developed and perfected through eight previous editions, and now rendered doubly useful here by the exhaustive American notes of C. F. Chamberlayne, whose edition of **BEST ON EVIDENCE** is used in many law schools. As **CHAMBERLAYNE'S BEST** has been a favorite work with students, **CHAMBERLAYNE'S TAYLOR** will doubtless find equal favor with practitioners. The American edition will be in three volumes, at a moderate price.

In looking up points of law, do not fail to consult **English Ruling Cases**, another good example of the new class of Anglo-American law books rendered possible and profitable under our present international copyright laws. Vol. 9, just published, brings the topics covered down to "Dramatic Copyright." The set, when it reaches its limit of thirty volumes, will include all the cases in the whole range of English reports in all the courts which are of special value outside of England, with such copious American notes by **IRVING BROWNE**, as render the series of great practical value to our bar.

The Green Bag continues to be the comfort and delight of a large circle of legal readers. Do you see it every month?

To students, we shall be glad to send our catalogue, "Aids to the Study of the Law"; and to practitioners, our catalogue, "Recent Books," without charge.
